

The compound acrylic and high reflectance fixture reflector system of the JK Lighting. ACR Retrofit Kit delivers a new level of performance and control for open lamp luminaires.

**Efficient:** Total luminaire efficiency exceeds 95%.

**Effective:** The Linear Acrylic Reflector combines precise reflection and refraction to manage brightness while delivering evenly distributed indirect illumination. Dramatically reduced contrast ratios and source brightness control improves visual performance.

**Attractive:** Virgin acrylic prism geometry adds sparkle to any application.

**Specifications**

Reflector Material: Miro4™ or Baked White Enamel & Virgin DR Acrylic
